

The image is a geological cross-section of the Baganza River area, showing three boreholes (SIG3, S9, SI7) and a surface profile. The section displays various geological layers labeled with codes like Gs, Gsl, Alg, Gal, Al, Lag, Lsg, and La. Elevation markers are provided for each borehole and along the surface profile. A dashed blue line indicates a specific geological boundary, and a red line shows the water level profile. A vertical green dashed line labeled P07 is also present.

Key Features and Labels:

- Boreholes:**
 - SIG3 146.13:** Located on the left, showing a water level of 147.50 and a profile with points 1, 2, 3, and 1.
 - S9 145.20:** Located in the center, showing a water level of 145.70 W.L. T1000 and a profile with points 1, 2, 3, and 1.
 - SI7 146.66:** Located on the right, showing a water level of 147.50 and a profile with points 1, 2, 3, and 1.
- Geological Layers:**
 - Gs:** Gravelly sand (light yellow).
 - Gsl:** Gravelly sand with pebbles (light yellow).
 - Alg:** Gravelly sand with pebbles (light yellow).
 - Gal:** Gravelly sand with pebbles (light yellow).
 - Al:** Gravelly sand (light yellow).
 - Lag:** Gravelly sand with pebbles (light yellow).
 - Lsg:** Gravelly sand with pebbles (light yellow).
 - La:** Gravelly sand with pebbles (light yellow).
- Elevation Markers:**
 - 0.00:** Surface elevation at the top of each borehole.
 - 5.00, 10.00, 15.00, 20.00, 25.00, 30.00, 35.00, 40.00, 45.00:** Depth markers for each borehole.
- Other Labels:**
 - Torrente Baganza:** Located on the left, indicating the river's position.
 - P07:** A vertical green dashed line on the right side of the section.
